CATALOGUE

Designed products from Japan for the Australian home and office.

Established in 2003, our story has continued to be the provision of practical and beautiful items from Japan to enhance our local lifestyle. Our style is modern to classic and a large number of the items in our range are destined to become pieces that are enjoyed and treasured for many years. We only select brands and products that we believe in and many have won international design awards.

In here you will find lots of colour as well as a focus on natural tones and materials. Animal motifs are also very strong and add to the joy in the usage of the items. And so many cats! In case you are interested, cats outsell any other animal in any design and usually on a ratio of 2:1. This is closely followed by dogs.

We love working in the gift and homewares industry as the people are amazing and we really do appreciate your support, especially in these difficult times for retail. We know there is a lot of effort in running a retail business and if you could let us know how we can assist you in any way at all we promise that we will try our best for you.

Please enjoy our latest catalogue and feel free to contact us for any queries at all.

Lisa Saito, Director

- Your minimum order is \$250 and we have Packing Units on some items. They are usually 5's or 10's or 12's and we believe that they are reasonable numbers to work with.
- Except for times of trade shows, an order is usually sent out within 48 hours if the products are in stock. If that is not possible, we will contact you to arrange the delivery according to your preference (i.e. backorder, wait for arrival of stock, etc).
- Orders can be placed on our website after applying for login, over the phone or via e-mail.
- With a strong commitment to the environment, we re-use freight packaging wherever possible and hope that you can appreciate our stance and understand when used boxes are sent.
- Payment terms are pro-forma for the first order after which you can request an application for credit.
- Living and Dining exhibits at the Life in Style trade fairs in Sydney each February and in August in Melbourne as well as others throughout the year.

T-Lab

Each piece in this collectible range is individually hand-carved from the light Albizia wood then sanded to softness by artisans before being hand-finished in Japan. No two animals are exactly the same and the tactile smoothness and character of these charming animals make them irresistibly adorable. Although often used as a decorations for children's rooms, they are most suitable for ages 7+ and are also loved by adults who collect them. Start your own collection today!

A note on the wood used for these animals:

The wood used for the T-Lab range is the fast growing tropical tree Alibizia to ensure eco-sustainability. To further support the environment, T-Lab also reforests plantations in order to re-pay the earth for its bounty.

Dogs

The wood of this series has been left closer to its natural form yet still shows great attention to detail. The simple design is highlighted with the painting on each dog and the attached tag shows its breed.

Polar Bear

Enjoy these heart-warming family scenes of polar bear families spending time together. Create your own gathering as you collect all designs and sizes.

Pole Pole

It is that time of year when new Pole Pole animals arrive to join the series. We love them all and they look good with the team. Add these to your collection and as always, we have no favourites as it is impossible to choose!

Pair Set

Small Pole Pole animals are very difficult to create as attention to detail must remain the same but on a much finer base. These pairs of animals featuring adult and child show this work to allow you a greater connection to your selected animals just as you would to a special jewel.

Pole Pole Dinosaur

Here come the Dinosaurs! They should be scary but in true Pole Pole style they still have that cute factor whilst remaining realistic. Slightly larger than the usual Pole Pole Animal series, they are easy to hold and move around as you play with them.

Bringing innovation to function

Driven by customer satisfaction, PLUS is a brand that creates functional stationery items. Since 1948 it has managed to establish itself as a leader in this field and today its range is full of colourful, practical items for your desk and journaling requirements.

Petit Tapes

Tapes in compact cases for a variety of uses.

The torque mechanism of the case across the entire series provides smooth application as the mini roller on the tip glides over your work. The head design allows for 2-way pasting – pull for longer pastings such as entire sentences and push for a small amount even as small as just one letter. The one-touch open/close cap protects the tape when not in use and the handy size makes it easy to carry and store.

Petit Marking Tape

A highlighter in innovative tape form. The mini roller head creates clean lines throughout your notes without blurred edges and as it is a tape that simply glides over your work, it won't smudge your writing.

Flat Clinch Stapler

These compact staplers are so easy to use. They staple pages with just a light touch and the flat clinch method closes the staple tighter to lessen volume when the papers are placed together. They are also very simple to load with staples – just one movement opens the fill-space and it can hold up to 100 staples at once which lessens the number of times you need to refill. The power-assist mechanism allows up to 50% less force needed to staple your pages and they can staple up to 25 sheets in one go. The ergonomic design includes a fingertip indent to guide you as you push down the stapler and it also includes an integrated staple remover. Uses standard size 10 staples.

Staple Free Stapler

Just imagine if there was a stapler that didn't need staples..... Here it is! Available in both Desktop and compact sizes, this stapler opens a small hook in your papers so that they are clipped firmly together. As there are no staples involved in the process at all, papers can later be placed in a shredder easily without the hassle of removing anything. The Desktop model comes with a gauge so you can evenly measure the distance from an edge and both sizes have an in-built power assist mechanism so very little pressure is required when stapling. This mechanism is unique to the PLUS range of staplers.

*Note that these staplers will make a hole in your papers as they fasten the pages together.

Scissors

PLUS scissors have incorporated a unique Fitcut Curve technology into their revolutionary curved blades to generate maximum cutting force with light pressure through every cut.

- ✓ The optimum blade-to-blade angle is maintained due to the special curved blades. The results are effortless, clean cutting all the way from the pivot point to the blade tip. The sharp-edged blades produce little friction to ensure smooth cutting even along curved lines.
- ✓ The pivot ring is precision-made from durable, low-friction material that results in long-lasting scissors that provide smooth and comfortable cutting.
- ✓ The double-layered grips minimize hand stress. The shape of the handles has been designed to produce the optimal transmission of cutting force with minimal pressure.
- ✓ Your grip is stabilised by resting your little finger on the rest integrated into the handle design.

Twiggy Scissors

Portable scissors with a secure locking system for safety when closed. Simply slide your thumb along the groove to open or close with just one hand. The blade cover clips on securely so you can safely carry the scissors in a bag and the slim shape won't take up much space. Fluorine coated blades so they don't stick to adhesive or tape.

good morning

Life with Design.

“Good design should have the power to impact your way of thinking.”

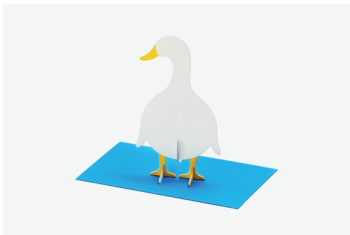

The comfort of seeing, touching and using with a sense of lightness and an element of surprise gently enriches space with good design. With the concept of Life with Design, good morning inc aims to attend to all these needs. Their animals and plants become 3-dimensional paper motifs for calendars, cards and notepads for you to enjoy as they subtly modify the space around you.

Multi-awarding winning range since 2000.

MD Paper Products

Designed for writer's comfort.

Midori craftsmanship created this quality paper in the 1960's and since then has been continually improving the range with the aim to create the ultimate standard in writing paper. Pared down to focus on the paper by removing all adornments, this range offers a clean slate for writers and artists. Created through nine processes and bound only with cheesecloth mesh tape on the spine to ensure there is no barrier to the notebook lying totally flat for ease of writing. The binding is also a delicate accent to the sophisticated simplicity of style that allows your words to flow.

All paper items made in Japan.

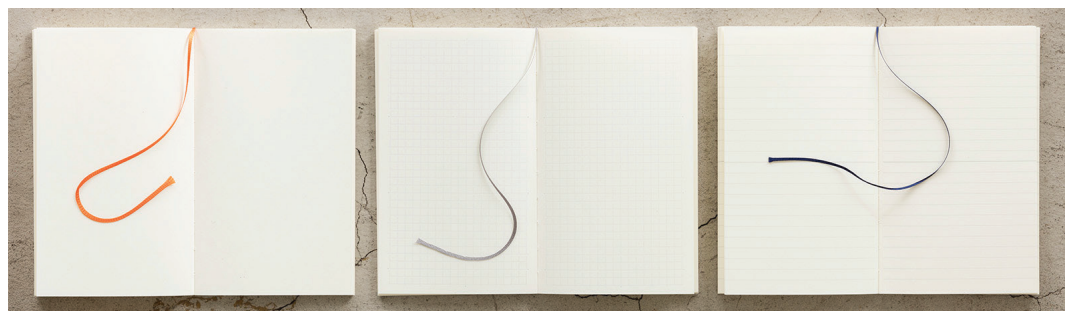

MD Notebook

Minimalistic appeal to enhance the enjoyment of writing. The use of traditional thread-stitched bookbinding methods ensures that the notebook lays entirely flat to 180° for the ultimate ease of writing.

Travelers Company series has a simplicity of design to inspire your own thoughts and dreams as you travel. With a strong following worldwide, it is loved by collectors and travelers. It was first created over 10 years ago under the Midori label and has since diverged to become its own brand and also includes lines such the popular Brass Products and Kraft Envelopes.

Travellers Notebook

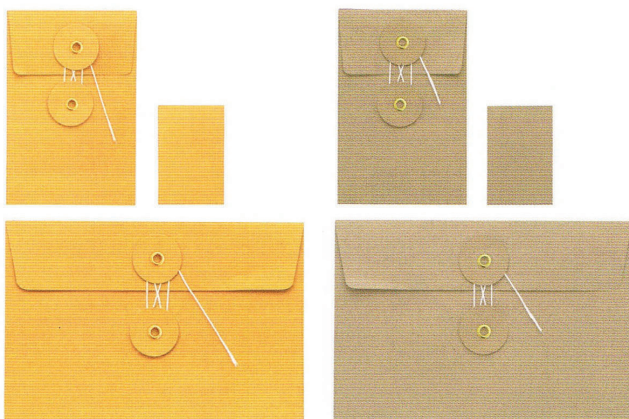

Travelers Notebook has a leather cover which improves with age as it softens to your own use. The simplicity of the design allows you to create your own world and it is hoped that it tempts you to go travelling with this in your hands. The leather covers are made by hand with no chemical treatments and the paper is made in Japan to the highest standard. Various inserts are available for both Standard and Passport sizes.

Please note that conditions apply to the sale of the Travelers Notebook series. Contact us for details and we will be happy to work through these with you.

Kraft Envelopes

Envelopes designed to send more than just a letter. Available in 2 colours, both with natural overtones. These envelopes sell well both in their packets or taken out and sold separately.

Working nature into design.

Winner of 15 international design awards worldwide including Red Dot Award, iF, Good Design and IDEA, this young company was only established in 2015 but is already garnering international attention and acclaim.

Inspired by natural elements and with a focus on sustainable bamboo and metal, this beautifully designed range has been created to combine both ultimate functionality and design. As a further nod to their environmentally-aware credentials, almost all parts of each item are recyclable.

All items are made in Taiwan from bamboo and aluminium.

Fibre Pen *Write like nobody's watching*

All pens in this series are wonderfully balanced for writing and won the prestigious Red Dot Design Award in 2018.

Each pen has perfect weight distribution so that when writing the centre of the gravity point is towards the nib for enhanced balance to give you the best possible writing experience. The fibre is the lines carved into the body of the pen to represent the bamboo which is also one of the materials of all the pens on this series.

Animal Pen

amabro™

Hand-carved pens featuring birds and animals.

The wood used for these pens is from Amorpha, colloquially known as Indigo Bush, which is harvested from sustainable plantations. Farmers make enclosures from this tree to prevent wild animals from destroying their farms and as soon as they are felled, more are planted. They also sell wood from felled trees on the open market to support their income further. It is a circular method to preserve both land and native animals which in turn ensures sustainable forest resources.

Length: Approx. 165mm

Camel Pencil is one of those companies established in downtown Tokyo many years ago. Over the years it has won awards including Good Design Award yet it remains a small company in a now densely populated area. It manufactures products that is can be proud of and stays true to its own philosophies rather than become a large commercial brand.

Just one plate of steel has been used to create each of these home ware items which have been designed for everyday use. The minimalistic forms are deceptively simple structures that are both beautiful and functional.

1 Plate Products is a subsidiary of an engineering company that manufactures aircraft and automobile parts. The designers of this recently formed company were tasked with utilising the exceptional skills developed in working with hard materials such as the steel used in these products to produce items with a high standard of both modern and practical design.

All items made in Japan.

Multi-Opener

With this one tool you can easily open a range of containers. The standard bottle opener is centred to be weighted evenly to ensure a light touch is all that is needed. One corner is sloped to open cans for pouring, there is a lip at the top to lift inner pull rings in lids and there is also an option to open lids from items such as water bottles. In these funky retro colours, they make great gifts too.

Letter Hook

Each of these hooks has been designed individually to create interest and increase functionality. Make words to add interest and relevance as you hang those necessary items throughout your workspace and home. They are also great for everyone to have their own hook and children love seeing their initial on the wall which could inspire them to hang up their coat.

Each hook comes with its own nails so that you only require a screwdriver to hang on your wall or shelf.

hirali

by Takeno Senko

These beautiful Hirali scarves are manufactured in Sakai City, Osaka, where this type of fine cloth has been produced since the Edo period of Japanese history. The company has now employed its expert skill to develop the only double-sided saturated dyeing technique on this type of cloth to create these reversible scarves.

The artisan in the company dedicated to this printing method is Mr Eiji Kakuno who is the only person to have perfected the method to dye both sides of this fine fabric in different totally different colours with no bleeding or overlapping of the pigment at all. The printing of the sharp lines of bold geometric patterns and stripes in both vivid and pastel colours is achieved with specialized roller dyeing machinery carefully guided by Mr Kakuno to create these modern pieces of wearable art.

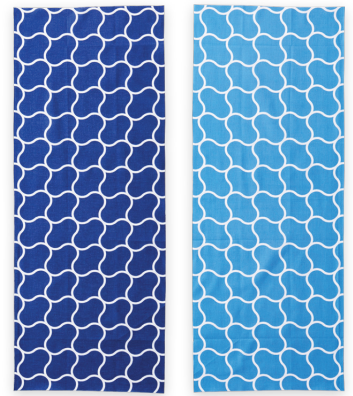

Gift Box also available.
